

padoan
vernici dal 1964

Padoan Vernici is the past, present and *future* of coatings and colour.

Founder Luigi Padoan, and the three generations which have followed him, have made innovation and customer care their cornerstones, delivering personalised coatings for design furniture, components and high-end wooden flooring.

Innovation and Technology

Padoan Vernici is a modern, flexible organisation; thanks to its highly specialised technical staff and an innovation-driven approach, it is able to anticipate market demands to deliver new, cutting-edge solutions.

Padoan Vernici is a modern, flexible organisation; thanks to its highly specialised technical staff and an innovation-driven approach, it is able to anticipate market demands to deliver new, cutting-edge solutions.

Working to a sustainable future

Sustainability has always been a priority at Padoan Vernici. We welcome this challenge and work with our clients on a daily basis to meet it, evolving and adapting the way we do business to improve our environmental, social and economic performance.

All Padoan Vernici products are formulated in compliance with the strictest regulations to ensure the safety of our workers and the environment.

The raw materials in our formulas are certified, so our clients' products meet the requirements of the most important national and international certifications.

Our production and storage facilities have been designed to be energy efficient and protect the environment around us.

All Padoan Vernici products are formulated and manufactured to meet the needs of the client's production facilities. Our technology is compatible with the different coating

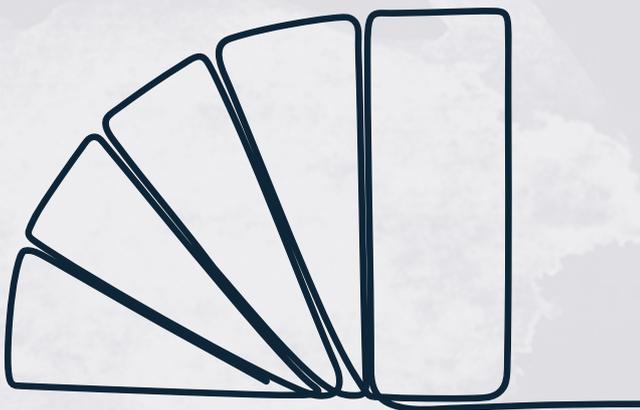

systems in use and our technical support staff are always on hand to offer their assistance, experience and expertise in even the most ambitious projects.

Bespoke **colour**

The relationship we have with our clients is unique, just like the innovative, top-quality, 100% customised products we create with and for them.

The Padoan Vernici colour specialists help clients choose the product that best meets their needs and, thanks to over 50 years' experience in the industry, deliver customised aesthetic solutions.

Client-oriented approach

Our laboratories develop and produce coatings with outstanding brilliance, strength, transparency, surface hardness and lightfastness

Shades, colours and special effects go through many stages before becoming prototypes: after an initial study phase, we design the surfaces they will be applied to, check the accuracy of application, test the product and control quality and durability.

The manufacturing process combines expert craftsmanship with technological performance.
